PRESS RELEASE

Haverhill, Massachusetts (September 30, 2015) Checker Motor Cars™ plans for new design and is pleased to announce the second generation Checker. This will be a Checker, Sport Pick-up Crossover! A cross between the iconic Checker sedan, sport pick-up body and the Aerobus VI (a six (6) door, twelve (12) passenger sedan). The sport pick-up is a unique vehicle that combines the usefulness of a pick-up truck with the fun of a full size car. The Aerobus offers four (4) full rows of seating through four (4) standard length doors and two (2) extended rearward doors. The 3rd row seat will fold to allow for additional leg room when not in use. Each of the new designs will offer second generation technology with 1980's appearance. Anticipated build is scheduled to begin the fall of 2018.

FEATURES

Checker Motor Cars™ goal is to offer as many of the features below, with retrofit kits to compliment Checker automobiles currently on the road.

Will accept a V8 Flex-fuel engine, Fuel injected or Diesel option, Full steel frame, Standard rear wheel drive, Electronic instrument panel, Power windows and door locks, Tilt adjustable steering column, Composite body panels, Four wheel disc brakes, Rack and pinion steering, Heavy duty climate control, Four wheel coil springs, Composite fuel tank

LED lights all around, Right hand drive option, All-wheel drive option, Service lantern, First aid kit, Built-in 120 volt AC inverter, On-board jump power pack with air compressor, Seat belt cutter combination rescue tool.
